SKILLS

C++, C, Java, Basic, Simple Directmedia Layer, Allegro, Linux, HTML.

TEAM PROJECTS

Annual MIT AI Competition, "Robocraft"

Cambridge, MA

October 2004 to December 2004

Designed and created debugging software for Robocraft, an annual AI competition held at MIT. Programmed in Java as part of a three-person team. Software was used by contest organizers as a prototype for the final version of the debugging software used by contestants in 2005 competition.

INDEPENDENT PROGRAM DEVELOPMENT

MIT Department for EECS: Advanced Undergraduate Project

Cambridge, MA

January 2004 to June 2004

Built an image filtering program in C with applicability to targa, bitmap and pcx files. Using a non-linear two-pass filter, the program creates an apparent focus, maintaining desired images and blurring unneeded images or image elements. Project could be used in the security industry.

Freelance Game Development

Arlington, MA

November 2005 to January 2006

Sword Draw Battle uses Simple Directmedia Layer to draw the player's attacks on his foes. Written in C++ in Linux, ported to Windows and Macintosh. The game is available for download at [http://wiki.utter-chaos.net/ucwiki/index.php/Chadius: SwordDraw](http://wiki.utter-chaos.net/ucwiki/index.php/Chadius:SwordDraw)
